

HospitalOS

Hospital Operating System for Africa

Privacy Policy

Version 1.0 · Effective 1 August 2026 · AgoroX Africa

This Privacy Policy describes how AgoroX Africa (“AgoroX”, “we”) handles personal data in connection with the HospitalOS platform, consistent with the Nigeria Data Protection Act 2023 (“NDPA”).

Template notice. *This is AgoroX's own template for the HospitalOS platform. It is not a substitute for review by qualified Nigerian legal counsel before it carries real contractual weight.*

1. Scope

This Policy covers two distinct categories of personal data, handled differently:

- **Tenant Data** — patient and staff records a hospital (“Tenant”) enters into HospitalOS. AgoroX processes this data solely as a data processor, on the Tenant's instructions, under the Tenant Service Agreement. The Tenant is the data controller for its own patients' and staff's records.
- **Platform Data** — information AgoroX collects directly, such as a Tenant's own administrative contact details, billing information, and platform usage logs. AgoroX is the data controller for this category.

2. What we collect

- **Account information** — name, email, role, and hospital affiliation for anyone with a HospitalOS sign-in.
- **Usage data** — which screens are accessed, when, and by which role, retained in the audit trail described in the Tenant Guide.
- **Device information** — a best-effort browser fingerprint (browser and OS combination) used to flag an unfamiliar sign-in, described in the Tenant Guide's staff account security section.
- **Billing and contact details** — for the Tenant's own administrative account, not for individual patients.

3. How Tenant Data is protected

- **Passwords** are cryptographically hashed; nobody at AgoroX, including support staff, can view a staff member's actual password.
- Every hospital's data is logically separated from every other hospital's on the platform.
- **Significant actions** are recorded in a tamper-evident, append-only audit trail.
- **Role-based access** is enforced on the server for every request, not just in the interface.

4. Data subject rights under the NDPA

A patient, or a staff member, has the right to request access to, correction of, or erasure of their own personal data. For Tenant Data, this request should go to the hospital (the data controller) first — HospitalOS provides the hospital's own Data Subject Access Request tools under Privacy in the Tenant Guide, with the statutory response window tracked automatically. For Platform Data, contact AgoroX directly at the address below.

5. Data retention

Tenant Data is retained for as long as the Tenant's subscription is active, plus any additional period required by Nigerian health-records regulation or agreed in the Tenant Service Agreement. On termination, the Tenant may request an export of its data before deletion.

6. International transfers

HospitalOS is hosted on Cloudflare's global network. Data may be processed in facilities outside Nigeria as part of Cloudflare's standard content-delivery infrastructure, under Cloudflare's own data processing terms. AgoroX does not sell or share Tenant Data with third parties for their own marketing purposes.

7. Contact

Questions about this Policy, or a data subject request directed at AgoroX itself, can be sent to support@agorox.africa.
